Premier delivers its services mostly throughout Australia and New Zealand.</p> <p>Primary Responsibilities:</p> <ul style="list-style-type: none">● ASP.NET C# Developer including developing, testing, deploying and maintaining ASP.NET 2.0 and 3.5 solutions.● .NET 3.5 C# Developer of back end databases and web services.● Developer of Edify Interactive Voice Response (IVR) applications. Including designing, coding, testing and deploying upgrades to existing enterprise applications. <p>Secondary Responsibilities:</p> <ul style="list-style-type: none">● Administrator of Premier Technologies Subversion source control system.● Administrator of Premier Technologies CruiseControl.NET build server including initial installation, configuration and maintenance.

September 2006 – June 2007

ASP.NET Developer at Westlink Consulting

Westlink Consulting is a leading property consulting company in Melbourne.

Primary Responsibilities:

- Developer and Database Administrator of their internal ASP.NET web application.
- System Administrator including network maintenance, server maintenance, monitoring of the web server and database server.

Key Achievements:

- Writing an error notification system to provide valuable information about errors in the system.
- Fixing critical errors in their SQL Server backup strategy by implementing a combination of full backups and transaction log backups enabling more comprehensive and faster disaster recovery for the 11 databases on the database server.
- Writing a survey application in ASP.NET AJAX using C#, Visual Studio 2005 and the AJAX Control Toolkit.
- **Creating a test environment by coping many of the databases on the database server onto a test server. This enabled for extensive testing and analysis that was previously not possible.**

Jonathan Marc Parker *As of 22/10/2008*

August - September 2006

ASP.NET Developer at GetStarted Australia.

GetStarted Australia is a web development company in Melbourne.

Primary Responsibilities:

- Reading requirements documents, analysing the requirements and implementing solutions.
- Testing code and ensuring coding standards were met according to the guidelines of the company.
- Working with the team and giving and receiving feedback whenever needed.

Key Achievements:

- At GetStarted I implemented a client side custom calendar selector in JavaScript and ASP.NET. This allowed the user to select an appointment time from a set of available times on the calendar without causing a post back to the server.

AREAS OF EXPERTISE

MICROSOFT

Medium to Advanced skills in .NET development with C# 2.0 and 3.0 and .NET 1.0, 2.0 and 3.5.

DATABASE

Advanced skills in SQL Server especially T-SQL, query tuning and indexing, stored procedures and database maintenance such as backup strategies and recovery plans.

NON - COMMERCIAL EXPERIENCE

Jonathan Marc Parker *As of 22/10/2008*

I have been learning **C#** and **.NET** in general for the last four and a half years. At the moment am learning **.NET 3.5**, specifically **LINQ**, **WCF**, **WPF** and **Silverlight**.

In 2005 I wrote an N-tier ASP.NET bug tracking application using SQL Server 2000 and C# as a university holiday project.

PROJECTS AND INTERESTS

I am interested in **SQL Server 2005/2008** and plan to complete my MCTS certification in SQL Server later this year.

I like to keep up-to-date by reading Blogs, listening to Podcasts and reading books.

Some of the books I have read include:

- Code Complete (2nd Edition)
- Professional ASP.NET 2.0
- Pragmatic Version Control
- Pragmatic Unit Testing
- Pragmatic Build Automation
- WPF Unleashed
- Silverlight 2
- (And many more)

EDUCATION/ QUALIFICATIONS

CERTIFIED

Microsoft Certified Technology Specialist: Web Applications in C# (June 2007).

A member of the Agile Alliance (<http://www.agilealliance.org>).

Training:

April 2008

Complete one day course on **Visual Studio 2008** and **.NET 3.5**.

December 2007

Completed **Edify Application Builder** and **Edify Application Administration** Interactive Voice Response (IVR) courses in the U.S.

March 2007

Completed three day course on Introduction to T-SQL

Jonathan Marc Parker *As of 22/10/2008*

Programming at Solid Quality Learning (March 2007).

February 2003 – July 2006 Bachelor of Computer Science (University of Melbourne).

January 2001 – December 2002 Victorian Certificate of Education (ENTER SCORE: 97.1).

SKILLS SUMMARY

Business Performance: I have worked extensively with clients on complex project requirements and developed skills in consultation and interaction and regard this with high priority in the continued development of my skill set.
